

## **Arrow Eco 300**

### Roll-to-Roll Desktop Finisher

#### **Compatible With Almost Any Roll Printer**

The Eco 300 is a roll-to-roll system that can cut out stickers and labels on virtually any substrate from any printer.

#### **Compact Design**

Economical engineering allows for a fit in any office or production facility with ease.

#### **Significantly Reduce Costs**

Save up to 200% on your label costs by switching to continuous roll stock and eliminating your inventory of pre-cut stock.

#### **User Friendly Software**

Using specially designed eye-marks, the Eco allows for seamless cutting of all shapes and sizes. Fast set up times allow for same day turnaround and rapid prototyping.

#### **Easy And Fast Setup**

Anyone can setup the Eco in just a few minutes with minimal training.

#### **Extremely Quiet Operation**

Use in any environment including your office or production facility.

# Arrow Eco 300

## Roll-to-Roll Desktop Finisher

### Technical Parameters

 Max Media Size:	16" (406mm)	 Max Cutting Speed:	3'/min
 Max Cutting Width:	12" (305mm)	 Max Roll OD:	14"
 Max Cutting Length:	6" (152.4mm)	 Power Requirement:	110V

### Materials:

 Paper, PP, BOPP,  
PET, PVC, & more!

#### Feeding System

Automatic feeder accepts 3" cores and media up to 16" wide!

#### Integrated Matrix Removal

Automatic matrix removal system continuously weeds label waste for a clean, professional finish.

#### Media Winder

Automatically rewinds die-cut and weeded media, providing a final product your customers will love!

#### Web Tension

Automatic web tension bars provide highly stable die-cutting performance and registration for remarkable consistency.

#### Automatic Contour Cutter

Proprietary black marks ensure fast and easy setup and operation. With incredible cutting speeds, the Eco 300 is the ideal solution for short-run label die-cutting.
