SLITTER

High Speed, Industrial, Roll-To-Roll Material Slitter

Introducing The Arrow Slitter! This high speed, roll-to-roll slitting system is the perfect offline tool for slitting and rewinding rolls of material or labels up to 500mm wide.

Large Production Capacities
Unwind/rewind allows for rolls with an OD of up to 19.6" (500mm). Servo driven unwind/rewind allows for consistent tension during the slitting process.
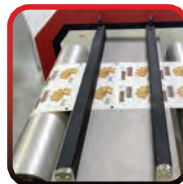

Any Size, Any time
With the capacity of up to 10 slitting blades, slit down to whatever size media you need, or slit a wide label roll into numerous individual rolls.

High Speed
Automated web guide ensures consistent web path alignment and straight cuts when slitting at high speeds up to 100 m/min.

Intuitive Touch Screen Display
Easy to use touch screen panel allows for full control of the web handeling system.

Trim Removal
Remove any unwanted edge scrap with the trim removal vacuume tube.

Specifications

Max. Media Width	19.6" (500mm)
Unwind Roll Diameter	19.6" (500mm)
Rewind Roll Diameter	13.78" (350mm)
Slitting Blades	Up To 10 Blades
Max Slitting Speed	100m/min
Min Slit Width	0.47" (12mm)
Core Size	3" (76mm)
Power Supply	3 Phase 220V
Air Source Requirements	6 Bar
Machine Dimensions	65"(L)X56.25"(W)X56"(H)
Supported Materials	Paper, PP, PET, PVC, BOPP, Mylar, Tyvek, Vinyl, and More!
